

For customers considering purchasing Lemnos products in countries outside of Japan

**Please be careful with
parallel imported (gray market) products.**

For proper function

We thank you for choosing Lemnos.

Lemnos has a distributing system that supports our products responsibly through our authorized dealers so that overseas customers can use them with confidence.

Recently, we have seen cases where our products that were produced for Japan domestic use are sold on overseas online stores without our permission. The specification of such products may differ from those sold through our authorized retailers. In particular, we have received complaints from international customers regarding Lemnos radio-controlled clocks not working properly. Our radio-controlled clocks are for Japan domestic use only and are not produced for overseas use.

Lemnos takes the current situation very seriously. This notice is intended to bring this issue to your attention.

Please note that we are not responsible for any issues arise from using such products sold by unauthorized venders. Furthermore, unauthorized products are not covered by the warranty even if defects are found. When purchasing Lemnos products, please confirm its authenticity.

For parallel importers and private sellers

Unauthorized copy and replication of Lemnos logo and product images have been used in unauthorized dealers' website. Using Lemnos trademark, logo, and / or product images without our permission infringes upon our copyright and trademark and is illegal. Individuals and companies must cease and desist any illegal activities associated with unauthorized selling of Lemnos products. Ignoring this warning and continuing such violation will result in strict legal action.
